Please note there is a small percentage of people whose skin does not react favorably to spray tanning. For this reason, we do NOT advise being sprayed for the first time when your appearance is important; ex, weddings, big events, any special occasion, photographic sessions, modeling assignments unless you have had a trial spray tan with Glam and Glow Luxury Beauty Studio within the last month. Those whom have allergies are asked to look at the ingredients list of the spray tan to insure that there is no cause of concern before proceeding with the spray tan process. There may be some people who are allergic to the base ingredients in the spray solution which may result in hives or a skin rash. If this occurs, shower and discontinue use. If severe reaction, contact a physician.

An airbrush tan will not protect your skin from burning in the natural sun or in a UV tanning bed. Healthy, hydrated skin will hold results longer. \*Use black sheets and black clothing if going to bed before showering. The initial bronzers in the spray tanning solution may transfer to clothing or fabric. The bronzers are water soluble and will wash out of most fabrics. For Those Choosing Our Premium Rapid Tan: You are responsible and are in total control for the outcome of how light or dark you would like your tan to be. We are not responsible for the outcome and have no control over the light or darkness of your tanning results.

We recommend that you hold your breath and close your eyes during facial spraying. We make this recommendation because most individuals would prefer not to breathe the mist. The FDA recommends that you take the following measures to protect against ingestion and inhalation during your sunless session by using: protective eyewear, nose filters, sealing lips with lip balm, and protective undergarments. Nose filters are available upon request.
